Can't Read Your Own Notes? Visit TheClassConnection.com for All the Study Resources a Student Could Need

Unique New Web Site Puts Notes, Study Guides, Organizational Aids, Course Management Tools, Academic Networks, and More at Students' Fingertips

MADISON, WI – Organization is an important part of the study process but can leave students with less time for learning and retaining the course content. TheClassConnection.com, created by two recent University of Wisconsin grads during their time at the school, puts all the resources a student could need at his or her fingertips, providing quick search options to help students find class-specific notes and flashcards, built-in database search applications, textbook outlines in wiki format, and nine sidebar tools that allow students to organize and personalize their study habits based on their specific classes. The site hosts the web's largest database of study material.

"Networking, organization and communication are key skills that students learn in school to apply when they enter the working world," remarked Dave Sargent, Chief Marketing Officer for theClassConnection.com. "The site puts the study resources every student needs at his or her fingertips in a clear, organized manner, while providing venues for class-related communication and networking. We're not a typical social networking platform; whereas most networking sites function primarily on a social level, theClassConnection.com serves to fill the void in the world of education technology."

TheClassConnection.com is open for free registration by any student with a school-provided email address. The quick search box at the top right corner of the main page allows students to check options and search several databases at a time, including theClassConnection's notes and flashcards collections, as well as Google, Wikipedia, and Dictionary.com.

For the ultimate in study organization, theClassConnection offers nine options for members. The left sidebar includes the following:

- **Classes** – With "department," "number," "professor," "section" and "title" fields, other students can easily find classmates and class-specific resources.
- **Connections** – Students can search for friends by school or class or browse their existing network and class connections.
- **Notes** – This sidebar option allows students to upload new notes, create a new study guide, access previously uploaded notes from current or completed classes, and search public notes and textbook wikis.
- **Flashcards** – Plan study routines, create flashcard decks, access flashcards from current and completed classes, and search public flashcards using the Flashcard tool.
- **Calendar** – Instead of struggling with as many as five syllabi, students can have an overhead view of the entire semester by creating a convenient and easily-customizable schedule for themselves.

- **Study Groups** – This resource lets students browse their existing study groups, search public groups, or take the initiative and form their own study network.
- **Tutoring** – The “Tutoring” tool allows ambitious students to create classifieds offering tutoring, search existing tutor classifieds, and manage current tutor-student relationships.
- **Messages** – Managing communications between connections is simple with this mail resource.
- **Talk** – Students can personalize their nicknames and avatars and participate in a number of school-related forum conversations.

Before you lose track of your syllabi this semester, sign up for theClassConnection to start getting organized today. For more information or to join theClassConnection, please visit:
